

B-PROTECT[®]

BAUWERK
Parkett

PRESERVES WHAT'S
BUILT TO LAST.

Bauwerk Parkett's innovative surface treatment works like an invisible shield, protecting and preserving the wood's natural beauty at the same time.

information on our website.*

Premium protection

We have developed B-Protect® to preserve the natural appearance of your parquet: an innovative surface treatment that delivers high performance and is virtually invisible. Visually, the B-Protect® surface differs only slightly from natural, untreated wood; functionally, it offers all the advantages of a classic lacquer coating. This fine, multi-coat lacquering is applied through an elaborate production process, fully covering the plank and protecting it reliably from everyday wear.

The advantages of B-Protect® surfaces:

High scratch resistance

The multiple coats of lacquer function like an invisible shield, providing your parquet with lasting resistance to wear.

Natural matt look

The matt surface showcases the wood's natural aesthetic in an authentic and virtually unaltered way, and hardly differs from untreated wood.

Outstanding water & chemical resistance

Combined with initial treatment, the B-Protect® technology completely seals the surface and offers reliable protection against moisture.

Low cleaning & care requirements

The invisible lacquering makes the surface particularly easy to care for, reliably repelling dirt and dust.

100 % healthy living

B-Protect® does not contain plasticisers or other harmful substances, complying with our 100 % healthy-living standard.

Proven UV stability

The innovative surface offers the best protection against changes of colour in your parquet, preserving its natural look even under prolonged exposure to sunlight.

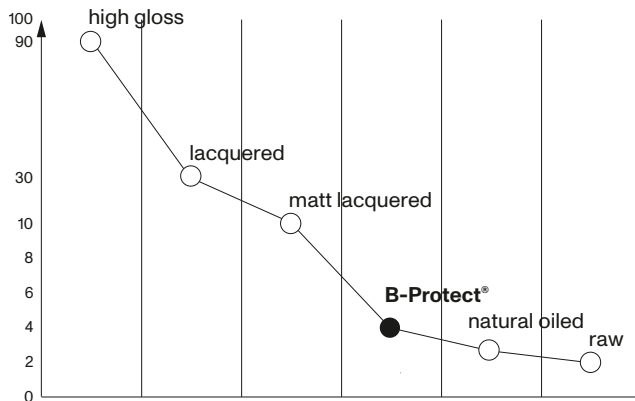

Technical information

Less gloss

Compared to other lacquer surfaces on the market, B-Protect® has an extremely low gloss value, delivering a matt, natural look.

Gloss Units [GU]

Lasting colour accuracy

Tests confirm that, compared to other surface treatments, B-Protect® is more stable to UV light, substantially slowing down the wood's natural change of colour. Discolouration remains minimal even with longer exposure to light, meaning that your floor's natural look will remain unchanged for many years to come.

Formats & colours

B-Protect® is one of the three sturdy surface treatments offered by Bauwerk Parkett, available with many of our formats and colours.

Bauwerk Parkett – Built for a lifetime

What began in 1935 with the invention of solid parquet by Swiss pioneer Ernst Göhner, sets new standards for ambitious design and healthy living today. Just like every tree and every piece of wood, each of our responsibly manufactured planks is sustainable and unique. A fusion of Swiss engineering and authentic nature results in extraordinary living experiences: today, and for future generations. bauwerk-parkett.com
