THE INTERPLAY OF DIFFERENT LENGTHS AND WIDTHS

Thanks to its impressive formats and the carefully selected oak wood, Unicopark enhances the character of exclusive and spacious rooms. Every plank is a hand-picked unique piece that is unlike any other, lovingly crafted to highlight its natural beauty.

Colours, surfaces and dimensions

The exclusive interplay of 1-strip planks in five different widths and lengths of up to four metres creates a unique, representative spatial effect – living up to the name Unicopark in every sense. Each plank offers ample surface area to showcase the wood’s natural structure and character – from lively to rustic – to striking effect. Thanks to the four-sided bevel, each plank stands out more clearly and further emphasises the generous dimensions of the format. This 3-layer parquet is available in a wide range of colours, always with a natural oiled surface. Selected Unicopark products are also available in a Handcrafted version, which makes the tactile experience even more pronounced.

Handcrafted

Unicopark Handcrafted stands out for its natural look and perfect imperfections: Traditional craftsmanship and a modern design aesthetic bring even more life into this exclusive floor. The manually refined surface produces an extraordinary interplay of colour, structure and integrated detail, preserving the natural quality of the wood. Knots and cracks are carefully highlighted through elaborate manual processes. Traditional brushing and planing techniques highlight the wood's structure and refined surface. Thanks to its charming irregularities, every plank is unique, providing elegant accents and a memorable tactile experience.

Careful planning of every single plank

1. Product selection

Choose from a range of eight colours, from very light to moderately dark, with two different floor surface structures, to best suit the style of your interiors. We also offer different gradings from lively to rustic.

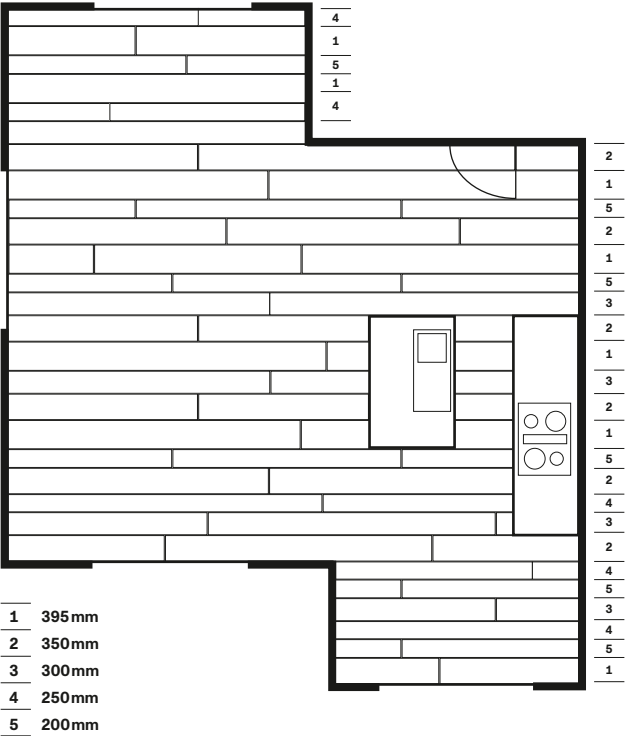

2. Floor plan & design

Your contact person for the parquet installation sends us the floor plan of your room, and the experts at Bauwerk Parkett develop a possible laying pattern, considering your room's conditions. This results in an optimal interplay of different lengths and widths of planks.

3. Approval & production

Once you approve the laying pattern, Bauwerk Parkett's experienced specialists carefully choose every plank for your floor before production, for precise installation and a uniform overall look.

Bauwerk Parkett – Built for a lifetime

What began in 1935 with the invention of solid parquet by Swiss pioneer Ernst Göhner, sets new standards for ambitious design and healthy living today. Just like every tree and every piece of wood, each of our responsibly manufactured planks is sustainable and unique. A fusion of Swiss engineering and authentic nature results in extraordinary living experiences: today, and for future generations. bauwerk-parkett.com
